

## Creating On-Contract Purchases

This document is a quick-reference guide for procurement users who need to create an on-contract purchase in the Arizona Procurement Portal (APP). If you have any questions, please contact the APP Help Desk at [app@azdoa.gov](mailto:app@azdoa.gov). Additional resources are also available on the SPO Website: <https://spo.az.gov/>.

APP allows requisitioners to create a requisition from a hosted catalog or a punch-out catalog. A hosted catalog is an internal catalog maintained by the State and its agencies. A punch-out catalog is an external catalog maintained and controlled by the supplier. After both types of requisitions have been created and submitted they go through the approval workflow that has been defined for that requisitioner's agency.
